

SYIFA AMARA DHESTYANI

Bandung, Jawa Barat | 081210571349 | syifaamdh@gmail.com | [Portfolio](#)

PROFILE SUMMARY

Computer Engineering graduate from Telkom University with practical experience through internships and academic projects in software development, mobile applications, backend systems, cybersecurity, DevSecOps, machine learning, databases, and data analysis. Skilled in Python, PHP, JavaScript, SQL, MySQL, Flutter, Docker, Git, Jenkins, and Linux. A detail-oriented, adaptable, and fast learner with strong analytical, problem-solving, communication, and teamwork skills. Able to work effectively in technical and cross-functional environments and open to opportunities across information technology, software development, data analysis, system operations, and digital solutions.

EDUCATION

Telkom University, Bandung

Bachelor of Computer Engineering | 2022 – 2026

Expected Graduate: June 2026 | GPA: 3.80/4.00

- **Relevant Coursework:** Machine Learning, Computer Networks, Cybersecurity, Database Systems, Operating Systems, Software Engineering.
- **Final Project:** Automated Mobile SAST and DAST System.

PROFESSIONAL WORK EXPERIENCE

PLN UP3 Makassar

Mobile Developer | Aug 2025 – Nov 2025

- Developed **JagaGrid**, a cross-platform mobile application using Flutter for monitoring high-risk trees near PLN power transmission lines.
- Integrated Firebase database services for real-time data storage, GPS-based tree location mapping, and field reporting management.
- Implemented GIS and map-based monitoring features to identify trees requiring trimming or removal around power grid areas.
- Developed notification and Telegram integration features to support real-time alerts for tree cutting and maintenance activities.
- Contributed to improving monitoring accuracy and operational response efficiency through mobile-based data collection and reporting systems.

Yan CeLOE – Telkom University

Backend & Database Developer Intern | Jun 2025 – Aug 2025

- Developed backend systems and database architecture for a web-based Document Management System (DMS) using PHP, CodeIgniter 4, and MySQL.
- Implemented CRUD operations, JWT Authentication, and Role-Based Access Control (RBAC) to enhance system security and access management.
- Integrated frontend components with backend services to support document upload, approval workflows, version control, and document management features.
- Collaborated with the development team using Agile methodology and participated in system testing and debugging processes.

PROJECTS

Automated Mobile SAST and DAST System

2025 – 2026

- Developed an automated mobile security testing system integrating Static Application Security Testing (SAST) and Dynamic Application Security Testing (DAST).
- Implemented automated vulnerability scanning workflows for Android applications using security testing tools and CI/CD concepts.
- Integrated automated security testing processes into a unified CI/CD pipeline using Jenkins to support continuous security scanning and monitoring.
- Developed automated email notification features to deliver vulnerability scanning results and security reports to users and development teams.

- Analyzed security vulnerabilities based on OWASP Mobile Top 10 standards to improve mobile application security assessment.

Deep Learning & Machine Learning Projects

2024 – 2025

- Developed deep learning models using PyTorch and TensorFlow, including CNN, MLP, RNN, GRU, LSTM, Bidirectional RNN, Deep RNN, and Sequence-to-Sequence Learning architectures.
- Evaluated model performance using Accuracy, Precision, Recall, F1-Score, and AUC-ROC metrics across multiple datasets.
- Built customer segmentation models using K-Means Clustering for Mall Customer datasets.

STM32 Light Monitoring System

2024

- Developed an embedded monitoring system using STM32F103C8T6, LDR sensor, LCD I2C, and 7-segment display for real-time light intensity monitoring.
- Implemented ADC, GPIO, timer interrupt, and I2C communication using STM32 HAL libraries.
- Designed LED indicator functionality and sensor-based monitoring outputs on LCD and 7-segment displays.

Ball Balancing System with PID Controller

2024

- Developed a ball balancing system using PID Controller to maintain ball position stability automatically.
- Implemented sensor-based feedback mechanisms and embedded control system concepts on hardware devices.

Laundry Data Management Website

2024

- Developed a web-based laundry management system using PHP and MySQL for managing customer, payment, and laundry service data.
- Implemented CRUD operations and local deployment using XAMPP.

Borcelle Beautyverse (AR Beauty App) – UI/UX Design

2023

- Designed an AR beauty application prototype using Figma featuring facial analysis and virtual beauty product try-on concepts.
- Created interactive UI/UX designs focused on skincare recommendations and real-time user experience.

ORGANIZATIONAL EXPERIENCE

Engineering Student Association (HMTK)

Secretary of Overlook Activities – Student Resource Empowerment Division | Jan 2025 – Jun 2025

- Prepared administrative documents for events, including proposals, permission letters, reports, and accountability reports (LPJ).
- Managed event documentation and ensured administrative processes were completed before, during, and after activities.
- Coordinated with committees and division members to support smooth event execution.

Member of Student Resource Empowerment Division | Jan 2025 – Sep 2025

- Participated in organizing student development activities and department programs.
- Collaborated with team members to support student engagement and empowerment initiatives.

Secretary of Student Resource Empowerment Division | Oct 2025 – Dec 2025

- Managed administrative documentation and coordinated student development programs within the division.
- Assisted in organizing activities aimed at improving student engagement and skill development.

Everything Connected Laboratory

Secretary and Treasurer | 2023 – 2025

- Managed meeting schedules, documentation, agendas, and laboratory administration.
- Recorded financial transactions and prepared payroll reports for laboratory assistants.

Assistant in Computer Network and Data Laboratory | 2023 – 2024

- Guided students in conducting laboratory practical sessions on Computer Networks and Data.
- Assisted in delivering materials and monitoring students' practical progress.

Study Group Laboratory

Study Group on Robotics and Embedded System Technology

Member | 2023

- Participated in robotics and embedded system study sessions and contributed to group projects.
- Collaborated in developing a Car Line Follower project.

Cyber Security Study Group

Member | 2023

- Participated in cybersecurity study group activities focused on basic penetration testing, exploitation techniques, and Capture The Flag (CTF) challenges.
- Practiced vulnerability analysis, system exploitation, and problem-solving in cybersecurity simulation environments.
- Collaborated with team members during security learning sessions and hands-on exercises.

Tel-U Education Movement (UKM)

Event and Creative Team | 2022 – 2023

- Assisted in organizing and planning educational events, including scheduling, team coordination, and event execution.

OPEN MIND TEAM 2023

Chief Organizer | 2023

- Led the execution of event activities and coordinated the progress of each division to ensure successful event implementation.

TEAM FEST Committee

Liaison Officer Staff | 2023

- Supported event coordination and communication between committees, participants, and invited guests.

RESEARCH EXPERIENCE

Cyber Security Laboratory

Research Staff | Apr 2025 – Jun 2025

Research Title: *Identification of Original Voice Against Voice Changer Manipulation Through Spectrogram Analysis in Audio Forensics*

- Conducted audio forensic research to identify manipulated voices using spectrogram and formant analysis methods.
- Analyzed audio samples using Praat software by comparing formant values (F1, F2, F3, and F4) between original and manipulated voices.
- Contributed to research on digital evidence validation and voice authentication in cybersecurity and forensic investigations.

ACHIEVEMENTS & AWARDS

2nd Place – Palo Alto Networks Ultimate Test Drive Cybersecurity Hackathon

Oct 2025

- Achieved 2nd place in a cybersecurity competition focused on real-time attack simulation, threat analysis, and system defense strategies.
- Utilized Palo Alto Networks technologies for threat prevention and security policy enforcement in cybersecurity defense scenarios.

SKILLS

Hard Skills

- Programming: Python, PHP, JavaScript, SQL, C/C++
- Web Development: HTML, CSS, CodeIgniter 4, REST API
- Mobile Development: Flutter, Firebase
- Database: MySQL, Database Design, SQLite, Firebase
- Machine Learning & Deep Learning: TensorFlow, PyTorch, CNN, RNN
- Cybersecurity: SAST, DAST, OWASP Mobile Top 10, RBAC

- DevOps & Tools: Git, GitHub, Docker, Jenkins, XAMPP
- Microsoft Office: Microsoft Excel, Microsoft Word, Microsoft PowerPoint
- Design & Visualization: Figma, Data Visualization

Soft Skills

Communication, Teamwork, Problem Solving, Time Management, Adaptability, Leadership, Analytical Thinking, Attention to Detail, and Responsibility.

LANGUAGES

Indonesian: Native Proficiency

English: Intermediate
